

AMERICA'S ESSENTIAL HOSPITALS

Sarah Mutinsky Founding Senior Advisor Eyman Associates

Mutinsky focuses her practice on strategic regulatory, legislative, and advocacy assistance in health care law, policy, and financing. She works with a variety of clients from national and state associations to individual hospitals and health systems and other health care providers and suppliers.

Her particular expertise is in working with providers to develop Medicaid funding programs and related means of financing the nonfederal share of those programs to support their missions and to drive innovative care improvement. Mutinsky also regularly advises clients in the 340B Drug Pricing Program, informed by years of insight into the ever-changing regulatory and political environment around this program and its intersection with other changes across the health care system.

Mutinsky serves as Washington counsel to America's Essential Hospitals, using lessons from on-the-ground work to inform federal policy development. In turn, she leverages insight from regulatory and legislative advocacy at the national level to help further the interests of individual providers and state and local efforts across the country. Her policy experience is further grounded in her Master of Public Health in Health Policy.

She joined Eyman Associates during its inception in November 2011, after several years as an associate in the health care group at Ropes & Gray LLP. Before practicing law, Mutinsky worked as a consultant specializing in health care market research and sales force analysis.
